

# Daily Report

Yuxin Ma

07.23-07.26.2013

## Research

On Tuesday and Wednesday I was finishing the Visual SVM Demo 1 Report and refactoring the server side. Currently there was no update on ideas. On weekend I will continue surveying related papers on SVM and feature selection.

## Attic

From Thursday I was learning object-oriented techniques and design patterns in JavaScript in order to design the two main modules, VisualObjectFactory and SceneManager. The interfaces of VisualObjectFactory is nearly finished and Xinxin will continue maintaining it. On weekend I will write an initial version of SceneManager, especially the scene tree structure and deliver the code to Fangzhou.
